

Analytics & Portfolio Insights

Adopt a Data & Analytics-based business strategy

Anoud+ Analytics & Portfolio Insights provides insightful analysis and management reporting with coverage across multiple lines of businesses to drive a data-based strategy.

Swiss Re Portfolio Insights

Transforming Data into Insights

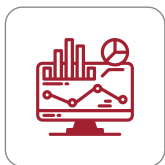

Portfolio Insights® offers clear and intuitive statistical information on insurers' portfolios with a dynamic drill-down functionality. For example, you can gain insights on underlying loss drivers and frequency and severity trends to enhance the underwriting strategy through the integration of external data.

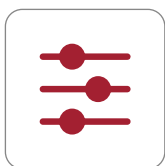

Gain Insights to Power your Business

Unified solution to process and analyse transactional policy and claims data on a daily incremental schedule.

Full range of standard management reporting with ability to generate customised reports.

Tailored for management and staff at different levels of the organisation.

The Anoud+ Advantage

Interactive Dashboards

Dashboards with premium and claims KPIs and periodic performance reviews (e.g., quarterly).

Visual Perspective

Visual analytics of performance evaluated by slicing and dicing data evaluated by a broad range of parameters.

Predictive Analysis

Predictive analysis of underwriting performance.

Anoud Technologies provides a truly integrated insurance suite that fully addresses the insurance lifecycle and facilitates key business functions.
